What is the Six-Year Capital Improvement Program?

The information that follows represents City of Ionia’s Six-Year Capital Improvement Program, prepared consistent with the City Charter. The purpose of this program is to estimate project details and costs, then allocate resources effectively as needed over the next six-year period, including an identification of all potential funding sources. The program serves as a crucial planning component within the City’s overall operational and financial structure. This document provides information that aids in maintaining the City’s critical facilities as well as equipment needed to deliver City services.

What is a Capital Project?

For the purposes of the Capital Improvement Program, a capital project is any project valued at \$5,000 or more with an estimated useful life greater than one year. Examples include building additions, building improvements, public safety vehicles, DAR buses, etc. This program identifies those projects that meet the criteria above, which are scheduled to be addressed in the next six years.

How is the program document developed?

The program is developed by the City Manager utilizing project information submitted by each City department head. Once all project requests have been received, the requests are reviewed and added to the program where appropriate. Projects identified in prior year programs remain in the current program and are updated as necessary unless a different priority or strategy results in removal. Once a final proposed document is prepared, it is submitted Ionia City Council for review. A public hearing conducted by City Council allows for ample discussion and for citizen input. Once the document is finalized, it is included in the budget for adoption by City Council.

How is the Capital Improvement Program organized?

The program is developed on a departmental basis. Summaries for the overall program are listed by department to help analyze the impact to each fund within the City. The summaries that follow highlight the annual cost of projects for each department per year, as well as summarize the sources of funding that have been identified each year to complete the projects. It should be realized that not all projects in this document will be completed. During the next six years, priorities may change, and/or funding sources may not come to fruition, making completion of the project unreasonable or impossible.

Uses of Funds

On a departmental basis, the six-year Capital Improvement Program includes the following appropriation requests, presented by fiscal year:
